# Safety Test Report

Report No.: AGC05443240620ES01

| | | |
|---|---|---|
| **PRODUCT DESIGNATION** | : | Wireless charger |
| **BRAND NAME** | : | N/A |
| **MODEL NAME** | : | MO6679 |
| **APPLICANT** | : | MID OCEAN BRANDS B.V. |
| **DATE OF ISSUE** | : | Jun. 28, 2024 |
| **STANDARD(S)** | : | EN IEC 62368-1: 2020+A11:2020 |
| **REPORT VERSION** | : | V1.0 |

***A**ttestation of **G**lobal **C**ompliance (Shenzhen) Co., Ltd.*

# TEST REPORT
# EN IEC 62368-1
# Audio/video, information and communication technology equipment
# Part 1: Safety requirements

| | | |
|---|---|---|
| Report Number | AGC05443240620ES01 | |
| Tested by(+ signature) | Bog Zhuang | Bog Zhuang |
| Reviewed by (+ signature) | Dylon Yan | Dylon Yan |
| Approved by (+ signature) | Byron Wang (Authorized Officer) | Byron Wang |
| Date of issue | Jun. 28, 2024 | |
| Total number of pages | Total 69 pages | |

**Testing laboratory**

| | |
|---|---|
| Name | Attestation of Global Compliance (Shenzhen) Co., Ltd. |
| Address | 1-2/F, Building 19, Junfeng Industrial Park, Chongqing Road, Heping Community, Fuhai Street, Bao'an District, Shenzhen, Guangdong, China |
| Testing location | Same as above. |

**Applicant**

| | |
|---|---|
| Name | MID OCEAN BRANDS B.V. |
| Address | Unit 201 2/F,. Laford Centre,838 Lai Chi Kok Road,Cheung Sha Wan,Kowloon,Hongkong |

**Manufacturer**

| | |
|---|---|
| Name | MID OCEAN BRANDS B.V. |
| Address | Unit 201 2/F,. Laford Centre,838 Lai Chi Kok Road,Cheung Sha Wan,Kowloon,Hongkong |

**Factory**

| | |
|---|---|
| Name | MID OCEAN BRANDS B.V. |
| Address | Unit 201 2/F,. Laford Centre,838 Lai Chi Kok Road,Cheung Sha Wan,Kowloon,Hongkong |

**Test specification:**

| | |
|---|---|
| Standard | EN IEC 62368-1: 2020+A11:2020 |
| Test procedure | Type test |
| Procedure deviation | N/A |
| Non-standard test method | N/A |

| **Test Report Form/blank test report** | |
| Test Report Form No..... : | AGC62368A3 |
| TRF originator..... : | AGC |
| Master TRF..... : | 2020-07 |
| **Test item** | |
| Test item description..... : | Wireless charger |
| Trade Mark..... : | N/A |
| Test model..... : | MO6679 |
| Series model..... : | N/A |
| Ratings..... : | Input: DC 9V/3A, DC 5V/2.1A<br>USB-Output: DC 5V/2A Max<br>Wireless output:15W Max |

| **Test item particulars** | |
|---|---|
| Product group ..... : | ☒ end product ☐ built-in component |
| Classification of use by..... : | ☒ Ordinary person ☒ Children likely present<br>☐ Instructed person<br>☐ Skilled person |
| Supply connection..... : | ☐ AC mains ☐ DC mains<br>☒ not mains connected:<br>☒ ES1 ☐ ES2 ☐ ES3 |
| Supply tolerance ..... : | ☐ +10%/-10%<br>☐ +20%/-15%<br>☐ + %/ - %<br>☒ None |
| Supply connection – type ..... : | ☐ pluggable equipment type A -<br>☐ non-detachable supply cord<br>☐ appliance coupler<br>☐ direct plug-in<br>☐ pluggable equipment type B -<br>☐ non-detachable supply cord<br>☐ appliance coupler<br>☐ permanent connection<br>☐ mating connector☒ other: not mains connected |
| Considered current rating of protective device..... : | ☐ 16 A;<br>Location: ☐ building ☐ equipment<br>☒ N/A |
| Equipment mobility..... : | ☒ movable ☐ hand-held ☒ transportable<br>☐ direct plug-in ☐ stationary<br>☐ for building-in<br>☐ wall/ceiling-mounted ☐ SRME/rack-mounted<br>☐ other: |

| | |
|---|---|
| Overvoltage category (OVC) ..... : | ☐ OVC I ☐ OVC II ☐ OVC III ☐ OVC IV ☒ other: not mains connected |
| Class of equipment ..... : | ☐ Class I ☐ Class II ☒ Class III ☐ Not classified ☐ |
| Special installation location ..... : | ☒ N/A ☐ restricted access area ☐ outdoor location ☐ |
| Pollution degree (PD) ..... : | ☐ PD 1 ☒ PD 2 ☐ PD 3 |
| Manufacturer's specified $T_{ma}$ ..... : | 40°C |
| IP protection class ..... : | ☒ IPX0 ☐ IP |
| Power systems ..... : | ☐ TN ☐ TT ☐ IT - $V_{L-L}$ ☒ not AC mains |
| Altitude during operation (m) ..... : | ☒ 2000 m or less ☐ m |
| Altitude of test laboratory (m) ..... : | ☒ 2000 m or less ☐ m |
| Mass of equipment (kg) ..... : | ☒ <7 kg |

**Possible test case verdicts:**

- test case does not apply to the test object..... : N(/A)
- test object does meet the requirement..... : P (Pass)
- test object does not meet the requirement..... : F (Fail)

**Testing:**

Date of receipt of test item..... : Jun. 20, 2024

Date (s) of performance of tests..... : Jun. 21, 2024–Jun. 28, 2024

**Attachments:**

Attachment A..... : Photos of product

**General remarks:**

This report shall not be reproduced except in full without the written approval of the testing laboratory.
The test results presented in this report relate only to the item tested.
"(See remark #)" refers to a remark appended to the report.
"(See appended table)" refers to a table appended to the report.
Throughout this report a point is used as the decimal separator.

Report Revise Record:

| Report Version | Revise Time | Issued Date | Valid Version | Notes |
|---|---|---|---|---|
| V1.0 | / | Jun. 28, 2024 | Valid | Initial release |

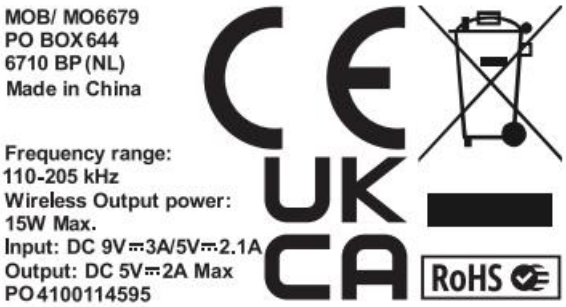
**General product information and other remarks:**

1. The product is a Wireless charger. It is considered as a transportable apparatus, for dry location used only.
2. Instructions and equipment marking related to safety is applied in the language that is acceptable in the country in which the equipment is to be sold.
3. The product was submitted and tested for use at the manufacturer's recommended ambient temperature (Tma) of 40°C.

**Summary of testing**

The product fulfils the requirements of EN IEC 62368-1: 2020+A11:2020

**Copy of marking plate:**



Remark:

1) The CE and UKCA marking and WEEE symbol (if any) should be at least 5mm and 7mm respectively in height.
2) The markings and instructions are the minimum requirements required by safety standard. For final production samples, the additional markings which do not give rise to misunderstanding may be added.
3) As declared by the applicant, the importer (and manufacturer, if it is different)'s name, registered trade name or mark and the postal address will be marked on the products before being place on the market.
4) Marking on the packaging or in a document accompanying the electrical equipment is only acceptable if it is not possible to place such markings on the product.

| OVERVIEW OF ENERGY SOURCES AND SAFEGUARDS | | | | |
|---|---|---|---|---|
| **Clause** | **Possible Hazard** | | | |
| 5 | Electrically-caused injury | | | |
| Class and Energy Source (e.g. ES3: Primary circuit) | Body Part (e.g. Ordinary) | Safeguards | | |
| | | B | S | R |
| ES1: All Internal circuits | Ordinary person | N/A | N/A | N/A |
| 6 | Electrically-caused fire | | | |
| Class and Energy Source (e.g. PS2: 100 Watt circuit) | Material part (e.g. Printed board) | Safeguards | | |
| | | B | 1st S | 2nd S |
| PS2: Input port<br>PS2: Internal circuits<br>PS2: Wireless output | All flammable materials inside and plastic enclosure | 1. No ignition occurred.<br>2. No parts exceeding 90% of its spontaneous ignition temperature. | 1. PCB is complied with V-0 material;<br>2. all other components: at least V-2 except for mounted on min. V-1 material or small parts of combustible material | N/A |
| PS1: USB-Output port | All flammable materials inside and plastic enclosure | N/A | N/A | N/A |
| 7 | Injury caused by hazardous substances | | | |
| Class and Energy Source (e.g. Ozone) | Body Part (e.g., Skilled) | Safeguards | | |
| | | B | S | R |
| N/A | N/A | N/A | N/A | N/A |
| 8 | Mechanically-caused injury | | | |
| Class and Energy Source (e.g. MS3: Plastic fan blades) | Body Part (e.g. Ordinary) | Safeguards | | |
| | | B | S | R |
| MS1: Edges and corners | Ordinary person | N/A | N/A | N/A |
| MS1: Equipment mass | Ordinary person | N/A | N/A | N/A |
| 9 | Thermal burn | | | |
| Class and Energy Source (e.g. TS1: Keyboard caps) | Body Part (e.g., Ordinary) | Safeguards | | |
| | | B | S | R |
| TS1: Accessible plastic enclosure | Ordinary person | N/A | N/A | N/A |
| 10 | Radiation | | | |
| Class and Energy Source | Body Part | Safeguards | | |

| | | | | |
|---|---|---|---|---|
| (e.g. RS1: PMP sound output) | (e.g., Ordinary) | B | S | R |
| Exempt group: indicator light | Ordinary person | N/A | N/A | N/A |
| Supplementary Information:<br>“B” – Basic Safeguard; “S” – Supplementary Safeguard; “R” – Reinforced Safeguard | | | | |

| ENERGY SOURCE DIAGRAM |
|---|
| **Optional**. Manufacturers are to provide the energy sources diagram identify declared energy sources and identifying the demarcations are between power sources. Recommend diagram be provided included in power supply and multipart systems.<br>Insert diagram below. Example diagram designs are; Block diagrams; image(s) with layered data; mechanical drawings |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| **4** | **GENERAL REQUIREMENTS** | | P |
| 4.1.1 | Acceptance of materials, components and subassemblies | See appended table 4.1.2 | P |
| 4.1.2 | Use of components | Components which are certified to IEC and/or national standards are used correctly within their ratings. Components not covered by IEC standards are tested under the conditions present in the equipment. | P |
| 4.1.3 | Equipment design and construction | No accessible part which could cause injury | P |
| 4.1.4 | Specified ambient temperature for outdoor use (ºC)..... : | | N |
| 4.1.5 | Constructions and components not specifically covered | No such parts. | N |
| 4.1.8 | Liquids and liquid filled components (LFC) | No such parts. | N |
| 4.1.15 | Markings and instructions | (See Annex F) | P |
| 4.4.3 | Safeguard robustness | | P |
| 4.4.3.1 | General | | P |
| 4.4.3.2 | Steady force tests | (See Annex T.4) | P |
| 4.4.3.3 | Drop tests | (See Annex T.7) | P |
| 4.4.3.4 | Impact tests | | N |
| 4.4.3.5 | Internal accessible safeguard tests | | N |
| 4.4.3.6 | Glass impact tests | | N |
| 4.4.3.7 | Glass fixation tests | | N |
| | Glass impact test (1J) | | N |
| | Push/pull test (10 N) | | N |
| 4.4.3.8 | Thermoplastic material tests | (See Annex T.8) | P |
| 4.4.3.9 | Air comprising a safeguard | | N |
| 4.4.3.10 | Accessibility, glass, safeguard effectiveness | All safeguards remained effectively. | P |
| 4.4.4 | Displacement of a safeguard by an insulating liquid | | N |
| 4.4.5 | Safety interlocks | No such component within equipment. | N |
| **4.5** | **Explosion** | | P |
| 4.5.1 | General | No explosion occurs during normal/abnormal operation and | P |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | | single fault conditions | |
| 4.5.2 | No explosion during normal/abnormal operating condition | (See Clause B.2, B.3) | P |
| | No harm by explosion during single fault conditions | (See Clause B.4) | P |
| **4.6** | **Fixing of conductors** | | N |
| | Fix conductors not to defeat a safeguard | Not defeat a safeguard. | N |
| | Compliance is checked by test.....: | | N |
| **4.7** | **Equipment for direct insertion into mains socket–outlets** | | N |
| 4.7.2 | Mains plug part complies with relevant standard..: | | N |
| 4.7.3 | Torque (Nm)..... : | | N |
| **4.8** | **Equipment containing coin/button cell batteries** | | N |
| 4.8.1 | General | | N |
| 4.8.2 | Instructional safeguard.....: | | N |
| 4.8.3 | Battery compartment door/cover construction | | N |
| | Open torque test | | N |
| 4.8.4.2 | Stress relief test | | N |
| 4.8.4.3 | Battery replacement test | | N |
| 4.8.4.4 | Drop test | | N |
| 4.8.4.5 | Impact test | | N |
| 4.8.4.6 | Crush test | | N |
| 4.8.5 | Compliance | | N |
| | 30N force test with test probe | | N |
| | 20N force test with test hook | | N |
| **4.9** | **Likelihood of fire or shock due to entry of conductive object** | | N |
| **4.10** | **Component requirements** | | N |
| 4.10.1 | Disconnect Device | | N |
| 4.10.2 | Switches and relays | | N |
| **5** | **ELECTRICALLY-CAUSED INJURY** | | P |
| **5.2** | **Classification and limits of electrical energy sources** | | P |
| 5.2.2 | ES1, ES2 and ES3 limits | (See appended table 5.2) | P |
| 5.2.2.2 | Steady-state voltage and current limits..... : | ES1 | P |
| 5.2.2.3 | Capacitance limits..... : | | N |
| 5.2.2.4 | Single pulse limits.....: | No such single pulses with the EUT | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 5.2.2.5 | Limits for repetitive pulses..... : | No such repetitive pulses with the EUT | N |
| 5.2.2.6 | Ringing signals | No such ringing signals with the EUT | N |
| 5.2.2.7 | Audio signals | Inernal speakers and supplied by ES1 circuit only. | N |
| **5.3** | **Protection against electrical energy sources** | | N |
| 5.3.1 | General Requirements for accessible parts to ordinary, instructed and skilled persons | ES1 | N |
| 5.3.1 a) | Accessible ES1/ES2 derived from ES2/ES3 circuits | | N |
| 5.3.1 b) | Skilled persons not unintentional contact ES3 bare conductors | | N |
| 5.3.2.1 | Accessibility to electrical energy sources and safeguards | | N |
| | Accessibility to outdoor equipment bare parts | | N |
| 5.3.2.2 | Contact requirements | | N |
| | Test with test probe from Annex V | | - |
| 5.3.2.2 a) | Air gap – electric strength test potential (V)..... : | | N |
| 5.3.2.2 b) | Air gap – distance (mm) ..... : | | N |
| 5.3.2.3 | Compliance | | N |
| 5.3.2.4 | Terminals for connecting stripped wire | | N |
| **5.4** | **Insulation materials and requirements** | | N |
| 5.4.1.2 | Properties of insulating material | | N |
| 5.4.1.3 | Material is non-hygroscopic | | N |
| 5.4.1.4 | Maximum operating temperature for insulating materials..... : | | N |
| 5.4.1.5 | Pollution degrees..... : | | N |
| 5.4.1.5.2 | Test for pollution degree 1 environment and for an insulating compound | | N |
| 5.4.1.5.3 | Thermal cycling test | | N |
| 5.4.1.6 | Insulation in transformers with varying dimensions | | N |
| 5.4.1.7 | Insulation in circuits generating starting pulses | | N |
| 5.4.1.8 | Determination of working voltage..... : | | N |
| 5.4.1.9 | Insulating surfaces | | N |
| 5.4.1.10 | Thermoplastic parts on which conductive metallic parts are directly mounted | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 5.4.1.10.2 | Vicat test..... : | | N |
| 5.4.1.10.3 | Ball pressure test..... : | | N |
| 5.4.2 | Clearances | | N |
| 5.4.2.1 | General requirements | | N |
| | Clearances in circuits connected to AC Mains, Alternative method | | N |
| 5.4.2.2 | Procedure 1 for determining clearance | | N |
| | Temporary overvoltage ..... : | | — |
| 5.4.2.3 | Procedure 2 for determining clearance | | N |
| 5.4.2.3.2.2 | a.c. mains transient voltage..... : | | — |
| 5.4.2.3.2.3 | d.c. mains transient voltage ..... : | | — |
| 5.4.2.3.2.4 | External circuit transient voltage..... : | | — |
| 5.4.2.3.2.5 | Transient voltage determined by measurement..... : | | — |
| 5.4.2.4 | Determining the adequacy of a clearance using an electric strength test ..... : | | N |
| 5.4.2.5 | Multiplication factors for clearances and test voltages..... : | | N |
| 5.4.2.6 | Clearance measurement..... : | | N |
| 5.4.3 | Creepage distances | | N |
| 5.4.3.1 | General | | N |
| 5.4.3.3 | Material group..... : | | — |
| 5.4.3.4 | Creepage distances measurement..... : | | N |
| 5.4.4 | Solid insulation | | N |
| 5.4.4.1 | General requirements | | N |
| 5.4.4.2 | Minimum distance through insulation ..... : | | N |
| 5.4.4.3 | Insulating compound forming solid insulation | | N |
| 5.4.4.4 | Solid insulation in semiconductor devices | | N |
| 5.4.4.5 | Insulating compound forming cemented joints | | N |
| 5.4.4.6 | Thin sheet material | | N |
| 5.4.4.6.1 | General requirements | | N |
| 5.4.4.6.2 | Separable thin sheet material | | N |
| | Number of layers (pcs) ..... : | | N |
| 5.4.4.6.3 | Non-separable thin sheet material | | N |
| | Number of layers (pcs) ..... : | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 5.4.4.6.4 | Standard test procedure for non-separable thin sheet material..... : | | N |
| 5.4.4.6.5 | Mandrel test | | N |
| 5.4.4.7 | Solid insulation in wound components | | N |
| 5.4.4.9 | Solid insulation at frequencies >30 kHz, $E_P$, $K_R$, $d$, $V_{PW}$ (V)..... : | | N |
| | Alternative by electric strength test, tested voltage (V), $K_R$..... : | | N |
| 5.4.5 | Antenna terminal insulation | | N |
| 5.4.5.1 | General | | N |
| 5.4.5.2 | Voltage surge test | | N |
| 5.4.5.3 | Insulation resistance (MΩ)..... : | | N |
| | Electric strength test..... : | | N |
| 5.4.6 | Insulation of internal wire as part of supplementary safeguard | | N |
| 5.4.7 | Tests for semiconductor components and for cemented joints | | N |
| 5.4.8 | Humidity conditioning | | N |
| | Relative humidity (%), temperature (°C), duration (h)..... : | | — |
| 5.4.9 | Electric strength test | | N |
| 5.4.9.1 | Test procedure for type test of solid insulation..... : | | N |
| 5.4.9.2 | Test procedure for routine test | | N |
| 5.4.10 | Safeguards against transient voltages from external circuits | | N |
| 5.4.10.1 | Parts and circuits separated from external circuits | | N |
| 5.4.10.2 | Test methods | | N |
| 5.4.10.2.1 | General | | N |
| 5.4.10.2.2 | Impulse test..... : | | N |
| 5.4.10.2.3 | Steady-state test..... : | | N |
| 5.4.10.3 | Verification for insulation breakdown for impulse test..... : | | N |
| 5.4.11 | Separation between external circuits and earth | | N |
| 5.4.11.1 | Exceptions to separation between external circuits and earth | | N |
| 5.4.11.2 | Requirements | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | SPDs bridge separation between external circuit and earth | | N |
| | Rated operating voltage $U_{op}$ (V)..... : | | — |
| | Nominal voltage $U_{peak}$ (V)..... : | | — |
| | Max increase due to variation $\Delta U_{sp}$ ..... : | | — |
| | Max increase due to ageing $\Delta U_{sa}$ ..... : | | — |
| 5.4.11.3 | Test method and compliance..... : | | N |
| 5.4.12 | Insulating liquid | | N |
| 5.4.12.1 | General requirements | | N |
| 5.4.12.2 | Electric strength of an insulating liquid..... : | | N |
| 5.4.12.3 | Compatibility of an insulating liquid..... : | | N |
| 5.4.12.4 | Container for insulating liquid..... : | | N |

| **1** | **Modification to Clause 3 .** | | |
| **3.3.19** | **Sound exposure**<br>*Replace 3.3.19 of IEC 62368-1 with the following definitions:* | | N |
| **3.3.19.1** | **momentary exposure level, MEL**<br>metric for estimating 1 s sound exposure level from the HD 483-1 S2 test signal applied to both channels, based on EN 50332-1:2013, 4.2.<br><br>Note 1 to entry: MEL is measured as A-weighted levels in dB.<br>Note 2 to entry: See B.3 of EN 50332-3:2017 for additional information. | | N |
| **3.3.19.3** | **sound exposure, *E***<br><br>A-weighted sound pressure ($p$) squared and integrated over a stated period of time, $T$<br><br>Note 1 to entry: The SI unit is $Pa^2$ s.<br>$E = \int_0^T p(t)^2 \, dt$ | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement – Test | Result – Remark | Verdict |
| **3.3.19.4** | **sound exposure level, *SEL***<br><br>logarithmic measure of sound exposure relative to a reference value, $E_0$, typically the 1 kHz threshold of hearing in humans.<br><br>Note 1 to entry: *SEL* is measured as A-weighted levels in dB.<br><br>$SEL = 10 \lg\left(\frac{E}{E_0}\right)$ dB<br><br>Note 2 to entry: See B.4 of EN 50332-3:2017 for additional information. | | N |
| **3.3.19.5** | **digital signal level relative to full scale, dBFS**<br><br>levels reported in dBFS are always r.m.s. Full scale level, 0 dBFS, is the level of a dc-free 997-Hz sine wave whose undithered positive peak value is positive digital full scale, leaving the code corresponding to negative digital full scale unused<br><br>Note 1 to entry: It is invalid to use dBFS for non-r.m.s. levels. Because the definition of full scale is based on a sine wave, the level of signals with a crest factor lower than that of a sine wave may exceed 0 dBFS. In particular, square wave signals may reach +3,01 dBFS. | | N |
| **2** | **Modification to Clause 10** | | N |
| **10.6** | **Safeguards against acoustic energy sources**<br>Replace 10.6 of IEC 62368-1 with the following: | | N |
| **10.6.1.1** | **Introduction**<br><br>**Safeguard** requirements for protection against long-term exposure to excessive sound pressure levels from personal music players closely coupled to the ear are specified below. Requirements for earphones and headphones intended for use with personal music players are also covered.<br>A personal music player is a portable equipment intended for use by an **ordinary person**, that:<br><br>– is designed to allow the user to listen to audio or audiovisual content / material; and<br>– uses a listening device, such as headphones or earphones that can be worn in or on or around the ears; and<br>– has a player that can be body worn (of a size suitable to be carried in a clothing pocket) and is intended for the user to walk around with while in continuous use (for example, on a street, in a subway, at an airport, etc.).<br><br>EXAMPLES Portable CD players, MP3 audio players, mobile phones with MP3 type features, PDAs or similar equipment. | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement – Test | Result – Remark | Verdict |
| | Personal music players shall comply with the requirements of either 10.6.2 or 10.6.3.<br><br>NOTE 1 Protection against acoustic energy sources from telecom applications is referenced to ITU-T P.360.<br><br>NOTE 2 It is the intention of the Committee to allow the alternative methods for now, but to only use the dose measurement method as given in 10.6.5 in future. Therefore, manufacturers are encouraged to implement 10.6.5 as soon as possible.<br><br>Listening devices sold separately shall comply with the requirements of 10.6.6.<br>These requirements are valid for music or video mode only.<br>The requirements do not apply to:<br>– professional equipment;<br><br>NOTE 3 Professional equipment is equipment sold through special sales channels. All products sold through normal electronics stores are considered not to be professional equipment.<br><br>– hearing aid equipment and other devices for assistive listening;<br>– the following type of analogue personal music players:<br>• long distance radio receiver (for example, a multiband radio receiver or world band radio receiver, an AM radio receiver), and<br>• cassette player/recorder;<br><br>NOTE 4 This exemption has been allowed because this technology is falling out of use and it is expected that within a few years it will no longer exist. This exemption will not be extended to other technologies.<br><br>– a player while connected to an external amplifier that does not allow the user to walk around while in use.<br><br>For equipment that is clearly designed or intended primarily for use by children, the limits of the relevant toy standards may apply.<br><br>The relevant requirements are given in EN 71-1:2011, 4.20 and the related tests methods and measurement distances apply. | | |
| **10.6.1.2** | **Non-ionizing radiation from radio frequencies in the range 0 to 300 GHz**<br><br>The amount of non-ionizing radiation is regulated by European Council Recommendation 1999/519/EC of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0 Hz to 300 GHz).<br>For intentional radiators, ICNIRP guidelines should be taken into account for Limiting Exposure to Time- | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement – Test | Result – Remark | Verdict |
| | Varying Electric, Magnetic, and Electromagnetic Fields (up to 300 GHz). For hand-held and body mounted devices, attention is drawn to EN 50360 and EN 50566. | | |
| **10.6.2** | **Classification of devices without the capacity to estimate sound dose** | | N |
| **10.6.2.1** | **General**<br><br>This standard is transitioning from short-term based (30 s) requirements to long-term based (40 hour) requirements. These clauses remain in effect only for devices that do not comply with sound dose estimation as stipulated in EN 50332-3.<br><br>For classifying the acoustic output $L_{Aeq,T}$, measurements are based on the A-weighted equivalent sound pressure level over a 30 s period.<br><br>For music where the average sound pressure (long term $L_{Aeq,T}$) measured over the duration of the song is lower than the average produced by the programme simulation noise, measurements may be done over the duration of the complete song. In this case, $T$ becomes the duration of the song.<br><br>NOTE Classical music, acoustic music and broadcast typically has an average sound pressure (long term $L_{Aeq,T}$) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the content and compare it with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song does not exceed the required limit.<br>For example, if the player is set with the programme simulation noise to 85 dB, but the average music level of the song is only 65 dB, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dB. | | N |
| **10.6.2.2** | **RS1 limits (to be superseded, see 10.6.3.2)**<br><br>RS1 is a class 1 acoustic energy source that does not exceed the following:<br>– for equipment provided as a package (player with its listening device), and with a proprietary connector between the player and its listening device, or where the combination of player and listening device is known by other means such as setting or automatic detection, the $L_{Aeq,T}$ acoustic output shall be ≤ 85 dB when playing the fixed “programme simulation noise” described in EN 50332-1.<br>– for equipment provided with a standardized connector (for example, a 3,5 phone jack) that allows connection to a listening device for general use, the unweighted r.m.s. output voltage shall be ≤ 27 mV (analogue interface) or -25 dBFS (digital interface) when playing the fixed “programme simulation noise” described in EN 50332-1.<br>– The RS1 limits will be updated for all devices as per | | N |

| EN IEC 62368-1 | | | |

| Clause | Requirement – Test | Result – Remark | Verdict |
| | between the player and its listening device, or where the combination of player and listening device is known by other means such as setting or automatic detection, the weekly sound exposure level, as described in EN 50332-3, shall be ≤ 80 dB when playing the fixed "programme simulation noise" described in EN 50332-1.<br>– for equipment provided with a standardized connector (for example, a 3,5 phone jack) that allows connection to a listening device for general use, the unweighted r.m.s. output level, integrated over one week, as described in EN50332-3, shall be ≤ 15 mV (analogue interface) or -30 dBFS (digital interface) when playing the fixed "programme simulation noise" described in EN 50332-1. | | |
| **10.6.4** | **Requirements for maximum sound exposure** | | N |
| **10.6.4.1** | **Measurement methods**<br><br>All volume controls shall be turned to maximum during tests.<br><br>Measurements shall be made in accordance with EN 50332-1 or EN 50332-2 as applicable. | | N |
| **10.6.4.2** | **Protection of persons**<br><br>Except as given below, protection requirements for parts **accessible** to **ordinary persons**, **instructed persons** and **skilled persons** are given in 4.3.<br><br>NOTE 1 Volume control is not considered a **safeguard.**<br><br>Between RS2 and an **ordinary person**, the **basic safeguard** may be replaced by an **instructional safeguard** in accordance with Clause F.5, except that the **instructional safeguard** shall be placed on the equipment, or on the packaging, or in the instruction manual.<br>Alternatively, the **instructional safeguard** may be given through the equipment display during use.<br><br>The elements of the **instructional safeguard** shall be as follows:<br><br>– element 1a: the symbol  , IEC 60417-6044 (2011-01)<br>– element 2: "High sound pressure" or equivalent wording<br>– element 3: "Hearing damage risk" or equivalent wording<br>– element 4: "Do not listen at high volume levels for long periods." or equivalent wording<br><br>An **equipment safeguard** shall prevent exposure of an **ordinary person** to an RS2 source without intentional | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement – Test | Result – Remark | Verdict |
| | physical action from the **ordinary person** and shall automatically return to an output level not exceeding what is specified for an RS1 source when the power is switched off.<br><br>The equipment shall provide a means to actively inform the user of the increased sound level when the equipment is operated with an output exceeding RS1. Any means used shall be acknowledged by the user before activating a mode of operation which allows for an output exceeding RS1. The acknowledgement does not need to be repeated more than once every 20 h of cumulative listening time.<br><br>NOTE 2 Examples of means include visual or audible signals. Action from the user is always needed.<br><br>NOTE 3 The 20 h listening time is the accumulative listening time, independent of how often and how long the personal music player has been switched off.<br><br>A **skilled person** shall not be unintentionally exposed to RS3. | | |
| **10.6.5** | **Requirements for dose-based systems** | | N |
| **10.6.5.1** | **General requirements**<br><br>Personal music players shall give the warnings as provided below when tested according to EN 50332-3, using the limits from this clause.<br><br>The manufacturer may offer optional settings to allow the users to modify when and how they wish to receive the notifications and warnings to promote a better user experience without defeating the safeguards. This allows the users to be informed in a method that best meets their physical capabilities and device usage needs. If such optional settings are offered, an administrator (for example, parental restrictions, business/educational administrators, etc.) shall be able to lock any optional settings into a specific configuration.<br><br>The personal music player shall be supplied with easy to understand explanation to the user of the dose management system, the risks involved, and how to use the system safely. The user shall be made aware that other sources may significantly contribute to their sound exposure, for example work, transportation, concerts, clubs, cinema, car races, etc. | | N |
| **10.6.5.2** | **Dose-based warning and requirements**<br><br>When a dose of 100 % *CSD* is reached, and at least at every 100 % further increase of *CSD*, the device shall warn the user and require an acknowledgement. In case | | N |

| EN IEC 62368-1 | | | |
|---|---|---|---|
| Clause | Requirement – Test | Result – Remark | Verdict |
| | the user does not acknowledge, the output level shall automatically decrease to compliance with class RS1.<br><br>The warning shall at least clearly indicate that listening above 100 % *CSD* leads to the risk of hearing damage or loss. | | |
| **10.6.5.3** | **Exposure-based requirements**<br><br>With only dose-based requirements, cause and effect could be far separated in time, defying the purpose of educating users about safe listening practice. In addition to dose-based requirements, a PMP shall therefore also put a limit to the short-term sound level a user can listen at.<br><br>The exposure-based limiter (EL) shall automatically reduce the sound level not to exceed 100 dB(A) or 150 mV integrated over the past 180 s, based on methodology defined in EN 50332-3.<br>The EL settling time (time from starting level reduction to reaching target output) shall be 10 s or faster.<br><br>Test of EL functionality is conducted according to EN 50332-3, using the limits from this clause. For equipment provided as a package (player with its listening device), the level integrated over 180 s shall be 100 dB or lower. For equipment provided with a standardized connector, the unweighted level integrated over 180 s shall be no more than 150 mV for an analogue interface and no more than -10 dBFS for a digital interface.<br><br>NOTE In case the source is known not to be music (or test signal), the EL may be disabled. | | N |
| **10.6.6** | **Requirements for listening devices (headphones, earphones, etc.)** | | N |
| **10.6.6.1** | **Corded listening devices with analogue input**<br><br>With 94 dB $L_{Aeq}$ acoustic pressure output of the listening device, and with the volume and sound settings in the listening device (for example, built-in volume level control, additional sound features like equalization, etc.) set to the combination of positions that maximize the measured acoustic output, the input voltage of the listening device when playing the fixed “programme simulation noise” as described in EN 50332-1 shall be ≥ 75 mV.<br><br>NOTE The values of 94 dB and 75 mV correspond with 85 dB and 27 mV or 100 dB and 150 mV. | | N |
| **10.6.6.2** | **Corded listening devices with digital input**<br><br>With any playing device playing the fixed “programme simulation noise” described in EN 50332-1, and with the | | N |

**-----END OF REPORT---**

# Conditions of Issuance of Test Reports

1. All samples and goods are accepted by the Attestation of Global Compliance (Shenzhen) Co., Ltd (the "Company") solely for testing and reporting in accordance with the following terms and conditions. The company provides its services on the basis that such terms and conditions constitute express agreement between the company and any person, firm or company requesting its services (the "Clients").

2. Any report issued by Company as a result of this application for testing services (the "Report") shall be issued in confidence to the Clients and the Report will be strictly treated as such by the Company. It may not be reproduced either in its entirety or in part and it may not be used for advertising or other unauthorized purposes without the written consent of the Company. The Clients to whom the Report is issued may, however, show or send it, or a certified copy thereof prepared by the Company to its customer, supplier or other persons directly concerned. The Company will not, without the consent of the Clients, enter into any discussion or correspondence with any third party concerning the contents of the Report, unless required by the relevant governmental authorities, laws or court orders.

3.The Company shall not be called or be liable to be called to give evidence or testimony on the Report in a court of law without its prior written consent, unless required by the relevant governmental authorities, laws or court orders.

4. In the event of the improper use of the report as determined by the Company, the Company reserves the right to withdraw it, and to adopt any other additional remedies which may be appropriate.

5. Samples submitted for testing are accepted on the understanding that the Report issued cannot form the basis of, or be the instrument for, any legal action against the Company.

6. The Company will not be liable for or accept responsibility for any loss or damage however arising from the use of information contained in any of its Reports or in any communication whatsoever about its said tests or investigations.

7.Clients wishing to use the Report in court proceedings or arbitration shall inform the Company to that effect prior to submitting the sample for testing.

8. The Company is not responsible for recalling the electronic version of the original report when any revision is made to them. The Client assumes the responsibility to providing the revised version to any interested party who uses them.

9. Subject to the variable length of retention time for test data and report stored hereinto as otherwise specifically required by individual accreditation authorities, the Company will only keep the supporting test data and information of the test report for a period of six years. The data and information will be disposed of after the aforementioned retention period has elapsed. Under no circumstances shall we provide any data and information which has been disposed of after retention period. Under no circumstances shall we be liable for damage of any kind, including (but not limited to) compensatory damages, lost profits, lost data, or any form of special, incidental, indirect, consequential or punitive damages of any kind, whether based on breach of contract of warranty, tort (including negligence), product liability or otherwise, even if we are informed in advance of the possibility of such damages.
